

St Augustine's College is hosting Dr Judi Newman

PARENTS-IN-TOUCH

Neuroscience

Shaping tomorrow's leaders through brain-based learning and influence.

Thursday 14 August
from 6-7pm

Dr Newman is the founder and director of the company, with a PhD in Organisational Neuroscience. Her unique expertise spans education, psychology, and neuroscience. A leading Australian authority in social cognitive neuroscience, she draws on her experience as a former high school principal and executive coach to provide practical insights into human motivation, learning, and influence.

Her passion for optimal brain function, grounded in her PhD research, resonates strongly with teachers in and beyond education.

Dr Newman's work focuses on:

- How the brain learns best.
- Training parents & teachers in brain-based learning.
- Improving decision-making and build high-performing learners.
